Hellenic Cables to supply Inter-Array Cables for Dominion Energy's Offshore Wind project

Cenergy Holdings announces, the successful completion of cable manufacturing and loading for shipment by Hellenic Cables, its cables segment, executing the contract awarded by Dominion Energy for the partial supply of inter-array cables for the Coastal Virginia Offshore Wind (CVOW) commercial project.

The purpose of this project is to provide approximately 2.6 GW of clean, reliable offshore wind energy, increasing the amount and availability of renewable energy to Virginia customers, creating the opportunity to provide clean and reliable energy and to offer substantial economic and environmental benefits to the Hampton Roads region. This project represents a viable and needed opportunity for Virginia to obtain clean renewable energy and realize its economic and environmental goals.

Hellenic Cables was responsible for the design, supply, and storage of approximately 50 km of 66 kV, XLPE insulated submarine inter-array cables, connecting the wind turbines to the offshore substation.

The cables were manufactured in Hellenic Cables' state-of-the-art submarine cable production facility in Corinth, Greece, over an extended period.

"We are proud to support Dominion Energy in this flagship project, one of the first commercial-scale offshore wind projects in the US, with our world-class cable design and manufacturing expertise. In doing so, we are doing our part in enabling the clean energy transition in Virginia, the United States and the world." commented Mr. Alexis Alexiou, CEO of Cenergy Holdings and Hellenic Cables.

"Hellenic Cables is a global leader and brings years of experience to help us deliver clean, renewable energy to our Virginia customers," said Joshua Bennett, Dominion Energy's vice president of offshore wind.

With this award, Hellenic Cables further consolidates its presence in the U.S. offshore wind market, following the award of Mayflower Wind array cables scope in early 2020. In addition, the establishment of Hellenic Cables America Inc., a wholly owned subsidiary, provides its US customers with direct support and expertise throughout the entire lifetime of their projects.

About Dominion Energy

More than 7 million customers in 16 states energize their homes and businesses with electricity or natural gas from Dominion Energy (NYSE: D), headquartered in Richmond, Va. The company is committed to sustainable, reliable, affordable and safe energy and to achieving net zero carbon dioxide and methane emissions from its power generation and gas infrastructure operations by 2050.
