

## PRESS RELEASE

Brussels, 18 January 2022

### **Hellenic Cables becomes the exclusive array cable supplier for the world's largest offshore wind farm**

Cenergy Holdings announces that Hellenic Cables, its cables segment, has been awarded the Dogger Bank C array cable contract by DEME Offshore, the renewables business unit of DEME Group. Already the designated cables' supplier for Dogger Bank A and B, Hellenic Cables becomes with this contract the sole inter-array cables' supplier for the world's largest offshore wind farm.

Located more than 130 km off the North East Coast, Dogger Bank Wind Farm is being developed in three phases – Dogger Bank A, B, and C – and each phase will have an installed generation capacity of up to 1.2 GW. Combined, the 3.6 GW project will be capable of powering up to 6 million homes contributing substantially to UK's and Europe's goal for net zero carbon emissions.

Dogger Bank C is a joint venture between SSE Renewables and Equinor, while Dogger Bank A and B are owned by SSE Renewables, Equinor, and Eni. SSE Renewables is leading the construction and delivery of all three phases of Dogger Bank Wind Farm, while Equinor will operate Dogger Bank Wind Farm on completion.

Under the new contract, Hellenic Cables will design, manufacture, test, and supply approx. 240 km of 66 kV XLPE-insulated inter-array cables and associated accessories. This is in addition to the 650 km of array cables already awarded for phases A & B. The cables will be produced at Hellenic Cables' vertically integrated, state-of-the-art submarine cables plant in Corinth, Greece. Production of the cables for Dogger Bank C is set to begin in 2023 and delivery will be a phased roll out in line with the project execution program.

*"We are proud to be the exclusive array cables supplier for the world's largest offshore wind farm, which provides the UK's largest single source of renewable energy. Dogger Bank C reinforces the position of Hellenic Cables as enabler of the clean energy transition"* commented Mr. Alexis Alexiou, CEO of Cenergy Holdings.

*"Over the past years, DEME Offshore and Hellenic Cables have been successfully delivering large-scale cable projects together. We very much look forward to partnering each other again and leveraging our joint expertise to deliver this major project"* said Mr. Bart De Poorter, General Manager DEME Offshore.

#### **About DEME Offshore**

*DEME Offshore, a subsidiary of the DEME Group, is the leading global solutions provider in the offshore energy industry. DEME Group is a world leader in the highly specialised fields of dredging, solutions for the offshore energy market, environmental and infra marine works. The company can build on more than 140 years of know-how and experience is a front runner in innovation and new technologies. DEME's vision is to work towards a sustainable future by offering solutions for global challenges: a rising sea level, a growing population, reduction of CO2 emissions, polluted rivers, seas and soils and the scarcity of natural resources. DEME can rely on 5,200 highly skilled professionals across the globe. With a versatile and modern fleet of over 100 vessels, backed by a broad range of auxiliary equipment, the company can provide solutions for even the most complex projects.*

### **About Equinor**

*Equinor is developing as a broad energy company, building a material position in renewable energy. Equinor now powers more than one million European homes with renewable offshore wind from four offshore wind farms in the United Kingdom and Germany. Equinor is building material offshore wind clusters in the UK, the US North East and in the Baltics. The company commissioned the world's first floating offshore wind farm in 2017 off the coast of Scotland and is positioned for future floating wind options in several geographies, including UK, Norway and Asia.*

### **About SSE Renewables**

*SSE Renewables is a leading developer, owner and operator of renewable energy across the UK and Ireland, with a portfolio of around 4GW of onshore wind, offshore wind and hydro. Part of the FTSE listed SSE plc, its strategy is to drive the transition to a net zero future through the world class development, construction and operation of renewable energy assets. SSE Renewables owns nearly 2GW of operational onshore wind capacity with over 1GW under development. Its 1,450 MW hydro portfolio includes 300MW of pumped storage and 750MW of flexible hydro. Its operational offshore wind portfolio consists of 580MW across three offshore sites, two of which it operates on behalf of its joint venture partners. SSE Renewables has the largest offshore wind development pipeline in the UK and Ireland at over 6GW.*

### **About Cenergy Holdings**

*Cenergy Holdings is a Belgian holding company listed on both Euronext Brussels and Athens Stock Exchange, investing in leading industrial companies, focusing on the growing global demand of energy transfer, renewables and data transmission. The Cenergy Holdings portfolio consists of Corinth Pipeworks and Hellenic Cables, companies positioned at the forefront of their respective high growth sectors. Corinth Pipeworks is a world leader in steel pipe manufacturing for the oil and gas sector and major producer of steel hollow sections for the construction sector. Hellenic Cables is one of the largest cable producers in Europe, manufacturing power and telecom cables as well as submarine cables for the aforementioned sectors.
