Hellenic Cables to supply inter-array cables for the BC-Wind offshore wind project in Poland

Cenergy Holdings announces that Hellenic Cables, its cables segment, was awarded a contract by DEME for the supply of inter-array cables for the BC-Wind offshore wind project in Poland.

Developed by Ocean Winds, an international offshore wind developer and a 50/50 joint venture between EDP Renewables and ENGIE, BC-Wind is located about 23km off Poland's Baltic Sea coast. Once operational, the 390 MW wind farm, comprising 26 wind turbine generators, will supply clean electricity to approximately half a million households each year.

Under the contract, Hellenic Cables will be responsible for the design, engineering, manufacturing, testing, and supply of approximately 70km, including spares, of 66kV inter-array submarine cables, as well as the supply of the associated cable accessories.

The cables will be produced at Hellenic Cables' state-of-the-art submarine cables manufacturing facility in Corinth, Greece with completion of production expected by the end of 2027.

This award follows the EPCI contract for export cables to the BC-Wind project, which Hellenic Cables, in consortium with DEME, signed with Ocean Winds.

Philip Scheers, General Manager Cables at DEME, said: *"DEME and Hellenic Cables have consistently demonstrated effective collaboration across multiple offshore wind projects. We anticipate that our shared expertise and commitment to excellence will lead to a safe and successful execution of the BC-Wind project."*

Kostas Savvakis, General Manager of Hellenic Cables, stated: *"This project further strengthens our role as a trusted partner in offshore wind developments across Europe. Our collaboration with DEME and Ocean Winds on the BC-Wind project reflects our proven capability to deliver high-quality cable solutions, supporting the energy transition in the Baltic region."*

Pete Geddes, BC-Wind Project Director at Ocean Winds, said: *"The selection of Hellenic Cables for the inter-array cables package marks another important milestone for the BC-Wind project as we progress through the construction phase. Their proven expertise in delivering high-quality submarine cable systems, combined with our close cooperation with DEME, will be key to ensuring the reliable and timely execution of this offshore wind farm in the Baltic Sea."*

About Cenergy Holdings

Cenergy Holdings is a Belgian holding company listed on both Euronext Brussels and Athens Stock Exchange, investing in leading industrial companies, focusing on the growing global demand of energy transfer, renewables and data transmission. The Cenergy Holdings portfolio consists of Corinth Pipeworks and Hellenic Cables, companies positioned at the forefront of their respective high growth sectors. Hellenic Cables is one of the largest cable producers in Europe, manufacturing power and telecom cables as well as submarine cables. Corinth Pipeworks is a world leader in steel pipe manufacturing for the energy sector and major producer of steel hollow sections for the construction sector.
